WORK EXPERIENCE

Web Design Lead Intern

November 2024 - June 2025

Bayonne Board of Education

Bayonne, NJ

- Led the redesign of the district website by managing page layouts and structure using Final Site CMS, resulting in improved accessibility and SEO for students, parents, and staff.
- Enhanced content organization by implementing calendars and announcements through CMS tools
- Delivered a cohesive user experience by collaborating with my supervisor to align designs with school branding and accessibility standards, resulting in a consistent and scalable website.

Undergraduate Generative AI Research Assistant

October 2024 - September 2025

New Jersey Institute of Technology

Newark, NJ

- Improved AI-generated image descriptions by implementing structured annotation protocols, resulting in context-adaptive narratives for scene transitions and action-heavy content.
- Prepared and validated labeled datasets in Microsoft Excel prior to model evaluation.
- Validated research findings through VR user testing and AI prompt refinement.
- Co-authored a technical research paper submitted to the ASSETS 2025 accessibility conference

Leasing Consultant

March 2026 - Present

Living Residential

Bayonne, NJ

- Utilized Yardi CRM and RentCafe to manage resident data and support leasing workflows
- Assisted prospects & residents with lease applications, lease renewals, portal access, and account-related support through CRM systems.
- Maintained leasing documentation and workflow tracking using Excel and cloud-based platforms.

PROJECTS

AI Search Performance Dashboard

AI Analytics Dashboard | Next.js, React, TypeScript, Tailwind CSS, Vitest

April 2026 - May 2026

- Developed an AI analytics dashboard inspired by real AI Search Analyst workflows to visualize KPI reporting, prompt performance, and AI visibility tracking
- Built interactive charts, analytics tables, and recommendation panels using React, Next.js, and Tailwind CSS to simulate AI search reporting across ChatGPT, Gemini, Claude, and Perplexity
- Implemented responsive UI design, hover animations, and automated testing with Vitest

Terrific Travels

Full Stack Travel Booking Platform | PHP, MySQL, RabbitMQ, Linux

January 2025 – May 2025

- Implemented secure password hashing and authentication workflows for backend account management
- Designed MySQL database structures for user and booking data
- Configured testRabbitMQServer.php as a Linux systemd daemon for backend service execution
- Supported backend debugging, deployment workflows, and Linux service management
- Integrated Amadeus API workflows for backend travel booking functionality

Voice2Website

AI Automation Platform | Next.js & Tailwind CSS

February 2025 - May 2025

- Developed an AI-powered platform that converts natural language input into publish-ready web content
- Implemented text-based AI-assisted formatting and website generation workflows from natural language input
- Designed responsive frontend interfaces using Next.js and Tailwind CSS
- Integrated GitHub-based workflow automation concepts for streamlined website publishing workflows
